The Effect of Music on the Human Body and Mind

Music for adolescents.
The power music has

to change emotions
and elevate or depress
mood is a key sign
that it would be an
effective tool to use in
counseling mood
disorders.

Adolescents,

especially, are
susceptible to the
effects of music. The
type of music
adolescents listen to
can be a predictor of
their behavior
(Hendricks, et al.,

1999).

Using music to
improve physical and
emotional health,

known as music therapy, is another helpful tool for adults with IDD. Activities can be as simple as clapping hands or tapping feet to music or participating in sing-

a-longs. Playing percussion instruments is another popular music activity, where the rhythm and vibrations can be felt.
