## **Cellular network - Wikipedia**

A cellular network or mobile network is a communication network where the link to and from end nodes is wireless. The

network is distributed  
over land areas called  
"cells", each served by  
at least one fixed-  
location transceiver  
(typically three cell  
sites or base  
transceiver

stations). These base stations provide the cell with the network coverage which can be used for transmission of voice ...

## **List of telephone switches - Wikipedia**

List of the mainly electro mechanical switching systems from Hasler AG Bern,

which were used in public telephone network in Switzerland for many decades. Hasler AG finally merged into Ascom in 1987. HS 25 (modified from the

Ericsson OL-100  
system with double  
relays and 25-point  
selector (Ericsson  
license), mainly used  
for small villages and  
towns in the counties)

# **OMNeT++ - Simulation Manual**

2 Overview¶. 2.1

Modeling Concepts¶.

An OMNeT++ model consists of modules that communicate with message passing. The

active modules are termed simple modules; they are written in C++, using the simulation class library. Simple modules can be grouped into

compound modules  
and so forth; the  
number of hierarchy  
levels is unlimited.  
The whole model,  
called network in  
OMNeT++, is itself a

## **Business telephone system - Wikipedia**

Key telephone systems are primarily defined by arrangements with

individual line  
selection buttons for  
each available  
telephone line. The  
earliest systems were  
known as wiring plans  
and simply consisted  
of telephone sets,

keys, lamps, and wiring.. Key was a Bell System term of art for a customer-controlled switching system such as the line buttons on the phones associated with such

systems.
