Satellite television - Wikipedia

Satellite television is a service that delivers television programming to viewers by relaying it from a communications satellite orbiting the Earth directly to the viewer's location. The signals are received via an outdoor parabolic antenna commonly referred

to as a satellite dish and a low-noise block downconverter.. A satellite receiver then decodes the desired television program for viewing ...

Starlink - Satellite Missions - eoPortal Directory

- Planet confirmed its ground team acquired the first radio signals from all three satellites minutes after Tuesday's launch, confirming the spacecraft were alive and well in orbit. - The SkySats offer Planet's customers high-resolution views of Earth, while a flock of more than 100 smaller Dove CubeSats provide wider area coverage at lower resolution.

Broadcasting - Wikipedia

Broadcasting is the distribution of audio or video content to a dispersed audience via any electronic mass communications medium, but typically one using the electromagnetic spectrum (radio waves), in a one-to-many model. Broadcasting began with AM radio, which came into popular use around 1920 with the spread of vacuum tube radio transmitters and receivers.
