Physics 115 Flashcards | Quizlet

--The work-energy theorem states that the change in kinetic energy of an object equals the net work done on that object. The only force doing work on the blocks is

the force from the person, which is the same in both cases. Since the initial kinetic energy of each block is zero, both blocks have the same final kinetic energy.

Universe - Wikipedia

The universe (Latin: universus) is all of space and time and their contents, including planets, stars, galaxies, and all other forms of matter and energy. The Big Bang theory

is the prevailing cosmological description of the development of the universe. According to estimation of this theory, space and time emerged together 13.799 ± 0.021 billion years ago, and the universe has been expanding ...

Genius - Wikipedia

A genius is a person who displays exceptional intellectual ability, creative productivity, universality in genres, or originality, typically to a degree that is associated with the achievement of new discoveries or advances in a domain of knowledge. Geniuses may be polymaths who excel across many diverse subjects or may show high achievements in only a single kind of activity.
