Our Experience of Tracheostomy in COVID-19 Patients

## **Modeling the lockdown relaxation protocols of the ...**

2/7/2020 · The Philippine Congress, through the Bayanihan to Heal as One Act, allocates US\$ 5.37 billion for the COVID-19 pandemic, where US\$ 3.9 billion is allotted for the implementation of the emergency subsidy program, and US\$ 1.4 for funding health requirements and other services []).The emergency subsidy program for two months covers the basic needs of the 18 million ...

## **Surviving Sepsis Campaign: International ... - Springer**

18/1/2017 · Objective To provide an update to “Surviving Sepsis Campaign Guidelines for Management of Sepsis and Septic

Shock: 2012". Design A consensus committee of 55 international experts representing 25 international organizations was convened. Nominal groups were assembled at key international meetings (for those committee members attending the ...

### **Liver trauma: WSES 2020 guidelines | World Journal of ...**

30/3/2020 · Liver injuries represent one of the most frequent life-threatening injuries in trauma patients. In determining the optimal management strategy, the anatomic injury, the hemodynamic status, and the associated injuries should be taken into consideration. Liver trauma approach may require non-operative or operative management with the intent to restore the homeostasis and ...

### **Choice of crystalloid fluid in the treatment of ...**

3/9/2019 · Diabetic ketoacidosis (DKA) and hyperglycemic hyperosmolar state (HHS) are life-threatening complications of diabetes mellitus which require prompt treatment with large volume crystalloid fluid administration. A variety of crystalloid fluids is currently available for use and differs in their composition and ion concentrations. While there are potential pros and cons for ...

### **A comprehensive protocol for ventilator weaning and ...**

6/11/2019 · Weaning protocols have become popularized since the publication of guidelines by the task force on ventilator discontinuation in 2001 [].Several studies have reported that weaning protocols reduced the total duration of ventilation, weaning duration, and intensive care unit (ICU) length of stay without impacting mortality or adverse events [2,3,4].

### **Intensive care management of patients with COVID-19: a ...**

18/2/2021 · SARS-CoV-2, the causative agent of coronavirus disease 2019 (COVID-19), is responsible for the largest pandemic facing humanity since the Spanish flu pandemic in the early twentieth century. Since there is no specific antiviral treatment, optimized support is the most relevant factor in the patient's prognosis. In the hospital setting, the identification of high-risk ...

### **Antimicrobial susceptibilities of *Proteus mirabilis*: a ...**

5/9/2014 · Longitudinal nationwide data on antimicrobial susceptibility in *Proteus mirabilis* from different sources are rare. The effects of the revised Clinical and Laboratory Standards Institute (CLSI)  $\beta$ -lactam breakpoints on susceptibility rates and on detecting extended-spectrum  $\beta$ -lactamase (ESBL) and AmpC  $\beta$ -lactamase-producers in this species are also seldom evaluated.

### **CORONAVIRUS GUIDEBOOK – Dr Galland**

15/3/2021 · A randomized clinical trial in Iran found that addition of bromhexine to usual care at the time of hospitalization produced an 80% reduction in ICU admissions and the need for mechanical ventilation and reduced the death rate from 12% to zero [118]. Researchers are looking at anti-androgen therapy for relieving severity of Covid-19.

### **Neuromuscular blockade management in the critically Ill ...**

24/5/2020 · Neuromuscular blocking agents (NMBAs) can be an effective modality to address challenges that arise daily in the intensive care unit (ICU). These medications are often used to optimize mechanical ventilation, facilitate endotracheal intubation, stop overt shivering during therapeutic hypothermia following cardiac arrest, and may have a role in the management of ...

### **Perforated and bleeding peptic ulcer: WSES guidelines ...**

7/1/2020 · Peptic ulcer disease is common with a lifetime prevalence in the general population of 5–10% and an incidence of 0.1–0.3% per year. Despite a sharp reduction in incidence and rates of hospital admission and mortality over the past 30 years, complications are still encountered in 10–20% of these patients. Peptic ulcer disease remains a significant healthcare problem, which can consume ...

### **Formal guidelines: management of acute respiratory ...**

13/6/2019 · Fifteen recommendations and a therapeutic algorithm regarding the management of acute respiratory distress

syndrome (ARDS) at the early phase in adults are proposed. The Grade of Recommendation Assessment, Development and Evaluation (GRADE) methodology has been followed. Four recommendations (low tidal volume, plateau pressure limitation, no oscillatory ventilation, and ...

### **External ventricular drain - Wikipedia**

An external ventricular drain (EVD), also known as a ventriculostomy or extraventricular drain, is a device used in neurosurgery to treat hydrocephalus and relieve elevated intracranial pressure when the normal flow of cerebrospinal fluid (CSF) inside the brain is obstructed. An EVD is a flexible plastic catheter placed by a neurosurgeon or neurointensivist and managed by intensive care unit ...

### **Coordinated Spontaneous Awakening and Breathing Trials ...**

Introduction. Reducing the number of days a patient is on mechanical ventilation has been shown to reduce the risk of ventilator-associated pneumonia. 1,2,3 Strategies for weaning patients off of mechanical ventilation are often not handled well, as the spontaneous awakening trials (SAT) and spontaneous breathing trials (SBT) are viewed separately. A protocol using coordinated SAT and SBT ...

### **Artificial ventilation - Wikipedia**

Artificial ventilation (also called artificial respiration) is a means of assisting or stimulating respiration, a metabolic process referring to the overall exchange of gases in the body by pulmonary ventilation, external respiration, and internal respiration. It may take the form of manually providing air for a person who is not breathing or is not making sufficient respiratory effort, or it ...

### **If Push Came to Shove... (Irving Trade) - RealGM**

24/9/2021 · Milton, Springer, Korkmaz, Reed, Drummond. ... but he also needs to speak with doctors who are seeing unvaccinated people filling ICU beds, ... amount to their own shadow roster of anti-vaxxers mounting a behind-the-scenes

resistance to Covid protocols — and the truth.

### **Nutrition therapy and critical illness: practical guidance for the ICU, post-ICU...**

21/11/2019 · Although mortality due to critical illness has fallen over decades, the number of patients with long-term functional disabilities has increased, leading to impaired quality of life and significant healthcare costs. As an essential part of the multimodal interventions available to improve outcome of critical illness, optimal nutrition therapy should be provided during critical illness, after ...

### **Critically ill cancer patient's resuscitation: a Belgian/French ... - [link.springer...](#)**

20/9/2021 · To respond to the legitimate questions raised by the application of invasive methods of monitoring and life-support techniques in cancer patients admitted in the ICU, the European Lung Cancer Working Party and the Groupe de Recherche Respiratoire en Réanimation Onco-Hématologique, set up a consensus conference. The methodology involved a systematic literature review, experts' opinion and ...

### **Safety of Bariatric Surgery During the Opening Phase After the ...**

Introduction: Increased morbimortality in patients with COVID-19 infection who had undergone surgery has raised concerns about bariatric surgery safety during the current COVID-19 pandemic. Currently, there is scarce literature on safety outcomes after bariatric surgery during the COVID-19 pandemic. Objectives: To determine the risk of symptomatic COVID-19 infection and associated ...

### **Indicators of intensive care unit capacity strain: a systematic ...**

1/2/2017 · Strained intensive care unit (ICU) capacity represents a fundamental supply-demand mismatch in ICU resources. Strain is likely to be influenced by a range of factors; however, there has been no systematic evaluation of the spectrum of measures that may indicate strain on ICU capacity. We performed a systematic review to identify indicators of strained capacity.

## **Crystalloid Composition and Rate of Fluid Administration for Resuscitating Patients in the ICU**

The trial included more than 10 000 patients, the majority of whom were randomized on their first day in the ICU at 75 ICUs in Brazil. Furthermore, there was little crossover between groups after enrollment, excellent adherence to the trial protocols, and near-complete follow-up.

## **COVID-19 Protocols - COVID-19 Critical Care**

16/6/2021 · Corticosteroid therapy is one of the most effective interventions in COVID-19 and MATH+. From early March 2020, when the FLCCC team of physicians first came together to study and create treatment protocols for fighting the novel disease, the team, guided by Dr. G. Umberto Meduri's expertise in corticosteroid use, placed methylprednisolone at the head — as the “M” — in its MATH+ ...

## **Medication errors and drug knowledge gaps among critical-care ...**

6/9/2019 · Medication errors are a serious and complex problem in clinical practice, especially in intensive care units whose patients can suffer potentially very serious consequences because of the critical nature of their diseases and the pharmacotherapy programs implemented in these patients. The origins of these errors discussed in the literature are wide-ranging, although far-reaching variables are ...

## **COVID-19 in the operating room: a review of evolving safety protocols ...**

20/7/2020 · The COVID-19 pandemic has already infected more than 3 million people across the world. As the healthworkers man the frontlines, the best practices model is continuously evolving as literature concerning the Coronavirus develops. A systematic review of the available literature was performed using the keyword terms “COVID-19”, “Coronavirus”, “surgeon”, “health-care workers ...

## **Full Text - Journal of Pharmaceutical Policy and Practice**

19/6/2020 · Alongside ICU nurses, physicians, and respiratory therapists, hospital pharmacists have been part of the COVID-19 efforts and their roles include management of drug shortages, development of treatment protocols, participation of patient rounds, interpretation of lab results for COVID-19, participant recruitment for clinical trials, exploration of new drugs, medication management advice, and ...

### **Our Experience of Tracheostomy in COVID-19 Patients - PubMed ...**

8/7/2020 · Tracheostomy in patients with COVID-19 requires significant decision making and procedural planning. Use of tracheostomy can facilitate weaning from ventilation and potentially increase the availability of much needed intensive care unit (ICU) beds, however this being a high aerosol generating procedure it does put the health care worker to risk of transmission.

### **Nutrition therapy and critical illness: practical guidance ...**

21/11/2019 · Although mortality due to critical illness has fallen over decades, the number of patients with long-term functional disabilities has increased, leading to impaired quality of life and significant healthcare costs. As an essential part of the multimodal interventions available to improve outcome of critical illness, optimal nutrition therapy should be provided during critical illness, after ...
