The Journal of Thoracic and Cardiovascular Surgery presents original, peer-reviewed articles on diseases of the heart, great vessels, lungs and thorax with emphasis on surgical interventions. An official publication of The American Association for Thoracic Surgery and The Western Thoracic Surgical Association, the Journal focuses on techniques and developments in acquired

cardiac ...

Ulnar nerve entrapment - Wikipedia

Ulnar nerve entrapment is a condition where the ulnar nerve becomes physically trapped or pinched, resulting in pain, numbness, or weakness, primarily affecting the little finger and ring finger of the hand. Entrapment may occur at any point from the spine at cervical vertebra C7 to the wrist; the most common point of entrapment is in the elbow (Cubital tunnel syndrome).

x Gastroschisis is a congenital abdominal wall defect where bowel is directly exposed to amniotic fluid during gestation, causing irritation and leading to shortening, twisting, or swelling. While the etiology remains unknown, there are likely both genetic and environmental factors that influence the incidence of gastroschisis [1].

T4 Syndrome - Physiopedia

T4 syndrome is a diagnosis of exclusion when all other diagnoses do not fit the clinical pattern. It is a rare occurrence of symptoms involving upper limb paraesthesia, weakness with reduced thoracic movement and tenderness on palpation of the T4 vertebra.. It was originally theorized these symptoms exist due to sympathetic nerve fibers converging at T4.
