## **Psychology**

Social changes are particularly notable as adolescents become more autonomous from their parents, spend more time with peers, and begin

exploring romantic relationships and sexuality. Adjustment during adolescence is reflected in identity formation, which often involves a period of exploration followed

by commitments to  
particular identities.

**Ethnic Identity - an  
overview |  
ScienceDirect Topics**

Barbara M. Newman,  
Philip R. Newman, in  
Theories of  
Adolescent  
Development, 2020

Multigroup ethnic identity measure.  
Ethnic identity is a multidimensional concept that includes self-categorization or labeling, commitment or attachment to a

group, certain values and beliefs that are associated with the group, and an evaluation of the group which can be positive or negative.

**What Is Cognitive  
Development? 3  
Psychology Theories**

In psychology, the  
focus of cognitive

development has often been only on childhood. However, cognitive development continues through adolescence and adulthood. It involves acquiring language

and knowledge,  
thinking, memory,  
decision making,  
problem solving, and  
exploration (Von  
Eckardt, 1996).

## **ScienceDirect Topics**

The DNA-V model can be used in a similar way for parent and child, but this will not be explored in this book. For a full exploration of

formulation using the  
DNA-V model we  
suggest you refer to  
The Thriving  
Adolescent by Louise  
Hayes and Joseph  
Ciarrochi (Hayes &  
Ciarrochi, 2015). The

DNA-V model is  
outlined in Chapter 1,  
Introduction, of this ...
