Farmers are taking advantage of this technology in rice, wheat, maize, chickpea and groundnut. Cotton, the first biotic crop, has brought Indian cotton production to the top level in the world. Genome-editing technology is the latest addition to the toolbox of crop, animal improvement.

### **Plants | Free Full-Text | A Critical Review of the Current ...**

However, seed production and post-harvest handling are highly dependent on the biology and agronomy of the species . While the FAO Genebank Standards [ 5 ] recommend seed drying to equilibrium in a controlled environment of 5–20 °C and 10–25% RH and many gene banks operate their drying room at 15 °C and 15% RH,

such a drying regime has been found to be not suitable for rice [ 21 , 22 ].

### **Biology Question Bank Gsb-1 [oq1n2vj3zz02]**

· Biology is divided into two branches : (1) Botany (2) Zoology · Botany : This science investigates the internal and external structures of plants through evolutionary and phylogenetical aspect. · Botanical science represents changes in internal and external structure of plants based on evolution and speciation.
