Descriptive Research - Definition & Methods

Descriptive research is a research design that is used to investigate

different phenomenon
and situations. It
always targets to
answer questions like
how the situation
happen, when in terms
of the time or date,
where in terms of the

place it happened, and what the issue or phenomenon is.

Computational complexity theory - Wikipedia

Computational

complexity theory
focuses on classifying
computational
problems according to
their resource usage,
and relating these
classes to each other.
A computational

problem is a task
solved by a computer.
A computation
problem is solvable by
mechanical
application of
mathematical steps,
such as an algorithm..

A problem is regarded
as inherently difficult
if its solution requires
...

Mathematical model - Wikipedia

A mathematical model
is a description of a
system using

mathematical concepts
and language. The
process of developing
a mathematical model
is termed
mathematical
modeling. Mathematical
models are used in the

natural sciences (such as physics, biology, earth science, chemistry) and engineering disciplines (such as computer science, electrical

engineering), as well
as in non-physical
systems such ...
