**Sensory Processing Disorder:
Symptoms, Diagnosis, Treatment**

17/12/2020 · Sensory processing

disorder (SPD) is a condition in which a person does not respond normally to sounds, smells, textures,

and other stimuli. They may be so sensitive to, say, a movie soundtrack they can't sit in a theatre, or so

insensitive to stimuli they go to great lengths to seek it out.

Sensory processing disorder - Wikipedia

Sensory processing disorder (SPD) is

a condition in which multisensory input is not adequately processed in order to provide appropriate

responses to the demands of the environment. Sensory processing disorder is present in many, but not

all people with autism spectrum disorders.. Sensory processing disorder was formerly known as

sensory integration dysfunction.
