Dark skin - Wikipedia

Dark skin is a type of human skin color that are rich in melanin pigments, especially eumelanin. People with very dark skin are often referred to as "black people", although this usage can be ambiguous in some countries where it is also used to specifically refer to different ethnic groups or populations. The evolution of dark skin is believed to have begun around 1.2 million years ago, in ...

Discovery of frog virus 3 microRNAs and their roles in ...

17/9/2021 · Frog virus 3 (FV3, genus Ranavirus) causes devastating disease in amphibian populations and is capable of subverting host immune responses. Evidence suggests that virus-encoded microRNAs (v-miRNAs) are implicated in host immunoevasion tactics. Thus, we sought to discover FV3-encoded v-miRNAs and to uncover their putative roles in immunoevasion.
